

## Development Officer - China (Internship)

Since 2001, InnoVent SAS has been developing, financing, building and operating wind and photovoltaic farms in France and sub-Saharan Africa. With more than 250 MW in operation and 150 MW under construction and awaiting authorization, InnoVent is one of the largest independent wind energy developers in France. InnoVent's footprint extends across the African continent, with over 1300 MW under development and a presence in some 15 African countries as IPP (Independent Power Producer). Since 2020, InnoVent extended its presence in China and wishes to reinforce its team with a development officer to support the development, in China, of solar PV rooftop. His/her objective is to ensure the smooth running of the projects.

### Mission

The development officer will have the following missions :

#### Gestion de projets

*Projects in development phase :*

- Understanding/knowledge of the legislative and legal framework specific to the project
- Support to institutional relations
- Follow-up of technical and environmental studies, in connection with local consultants and project engineers
